

UNF Threads cartridge pressure compensated flow control valves

FT 268/2

Compensated flow control valves available from 3/4" and 7/8" size - UNF THREADS. Max. working Pressure 320 Bar, adjustable oil flow rate from 5 to 35 Lt./min. (depending on the size)

Double-acting control

Pressure compensated flow control

UNF threads

Carbon steel

Technical information

Technical description

Pressure compensated flow control valves, to insert in modular units in line. The construction and functional characteristics reflect exactly those described for the two inlet valves. It is recommended to keep them in their protective wrapping until the mounting, in order to avoid possible drawbacks caused by eventual entry of particles into the delicate and essential parts for a good working. On page 100 is proposed a machining scheme for the embedding seat, which has to be observed to ensure the necessary accuracy of the valve.
