

Single-acting flow/braking control valves with and without bleed air execution

FT 243/5

Single-acting flow control valves available from 1/4" to 3/4" size - METRIC THREADS. Max. working pressure 300 Bar, adjustable oil flow rate from 0,2 to 80 Lt./min. (depending on the size)

Single-acting control

No pressure compensated flow control

METRIC threads

Carbon steel

Technical information

Technical description

They are composed of a needle throttling, inside which there is a ball single-acting valve. They can be used in the assembling in manifolds and integrated blocks and are also used as cylinder braking valves. The model FT 243/5-S can be used also as air breather. By removing the cap nut it is possible to unscrew the needle and uncover the coaxial passage which allows the breather of the underlying chamber. Recommended filtration: 60 micron or inferior. Max. working pressure: 300 bar
