

## In line carbon steel single-pilot check valves

### FT 257/9

In line single-pilot check valves available from 1/4" t 1/2" bsp, Max. working pressure 400 Bar, oil flow rate up to 140 t./min. ( depending on the size )

**In line**

**Pilot control**

**Carbon steel**

## Technical information

### Technical description

Belonging to the same range of the in line single-acting valves, except that, thanks to a specific signal of pilot operated pressure, they allow the valve to open in the usually flow direction. The high level of pilot ratio, realized in the design phase, enables rapid and complete opening for the whole duration of the desired cycle. The construction material used for the seal pistons, the hardened treatment undergone, as well as the finish-grinding guarantee a perfect seal even in particularly heavy working conditions. Applications: The above mentioned valves are generally used for blocking work circuits under pressure, such as security against falling loads in the event of pipe braking or against undesired movements of hydraulically locked loads.

### Materials

<b>CORPO VALVOLA / BODY VALVE</b>	<b>Acciaio/Steel 11 S Mn Pb 37-UNI EN 10087</b>
<b>VALVOLA DI RITEGNO / CHECK VALVE</b>	<b>Acciaio/Steel 39 Ni Cr Mo 3-UNI EN 10083</b>
<b>MOLLA / SPRING</b>	<b>Acciaio/Steel C 85-UNI EN 10089</b>
