## Technical information

### Technical description

Flow rate control valve, not compensated, for modular mounting with subplate surface according to ISO 4401-05. It permits a fine fluid regulation in one direction even with minimum flow rate, allowing the free flow in the opposite direction. Single regulation available on A or B or double A+B. Version with handwheel for flow rate allows its locking thanks to the screw it is equipped with. Flow rate 65L./min.
