

## 90° gauge isolators with lateral 1/2" port for inspection

### FT 01.291

90° gauge isolator for manometer, connection M-F with 1/2" lateral port and threaded cap

**90° needle valves with 1/2" lateral port and handwheel**

**Carbon steel**

## Technical information

### Technical description

They are generally used for hydraulic elevators subjected to initial and periodical tests by the institution in charge. They are normally used to protect the gauge as they have the double function of dampening pressure shock, when opening, and of isolating it from pressure line. Moulded in high-resistance steel, protected by an accurate treatment, subjected to strict tests, they ensure reliability and long life. A rotating swivel nut allows the user to plug the manometer, directing it to the more suitable position, with a single blocking operation. The sealing, supplied as standard, and inserted in the nut, prevents any leakages between the connection and the gauge. For pressure gauge with taper threads, it will be necessary to use copper washers FT 1201 (to be requested separately). Equipped with connectors FT 299-24, they also allow the connection of manometers with 1/2" BSP port. Suitable for pressure up to 400 bar and temperature from -20° to +100° they can be panel mounted by use of log panel nut (G), supplied on request.

### Materials

<b>CORPO VALVOLA / VALVE BODY</b>	<b>Acciaio/Steel 11 S Mn Pb 37-UNI EN 10087</b>
<b>SPIILLO / NEEDLE</b>	<b>Acciaio/Steel 35 S Mn Pb 10-UNI EN 10087</b>
<b>GUARNIZIONI / GASKETS</b>	<b>Di serie NBR - A richiesta FPM / Standard NBR-on demand FPM</b>
<b>ANELLI ANTIESTRUSIONE / ANTI-EXTRUSION RING</b>	<b>PTFE</b>
<b>MANOPOLA TIPO MP / KNOB TYPE MP</b>	<b>NYLON 66</b>
